The Power of Connection

Jan Kestle
President
Environics Analytics

Concert Hall
8:20 AM – 10:20 AM

We all have the same objective:
To ensure our organizations have better outcomes.

Organizations who leverage data & analytics have better outcomes.
And yet expectations are not always met.

Data and Intuition: Good Decisions Need Both

Today's most successful organizations leverage data when making high-impact business decisions. In fact, a recent survey of more than 1,000 senior executives revealed that data-driven organizations are three times more likely to report significant improvements in decision making compared to other firms that leverage data less.

Analytics And Data Science

How Well Does Your Company Use Analytics?

A study found only 39% of executives believe their organizations manage data as an asset, and even fewer (24%) view their companies as being data-driven.

Why is it so difficult?

There is no shortage of data. What matters is what you do with it.

Access

Analyze

Activate

Who are our most valuable customers and how can we reach more of them?

How do my customers compare to the larger market?

Where can I find untapped potential?

How do I translate the insights I have into effective marketing campaigns?

Where should I focus my marketing and media spend?

How far are my customers travelling to visit my location?

It's complex. You need a plan.
A lot goes into being data driven.

How we think about it. Connecting all the pieces.

Culture: Being data-driven requires focus, alignment & agility.
Find, retain & upskill the best team.

ENVISION

Data Collaboration
Services

Infrastructure: The underlying structure that makes a society work.

Key elements of infrastructure that enable the use of data and analytics for better outcomes:

- Powerful networks for phone and internet
- Sustainable and sovereign data centres
- Systems and processes to protect and enhance cybersecurity
- Ways to leverage the power of AI

Governance: Principles-based. Accountability supported by policies, processes & training. External reviews & audits.

Principles Based

-  Data Transfer
-  Where Data Resides
-  What Data We Accept
-  What is the Approved Usage
-  How Data is Secured
-  How to Mitigate Risks
-  Ethics
-  Internal Training & Awareness
-  Who Can Access the Data
-  How Long We Keep Data

Operations

-  Chief Data Officer
-  Chief Compliance & Risk Officer
-  Chief Privacy Officer
-  Data Stewards
-  Compliance Office Steering Committee

Training

-  Privacy & Security Foundations
-  Privacy & Security Access to PI
-  Privacy & Security Laws
-  Data Governance & Risk Management
-  Ethical Data Use
-  Role-Based Privacy & Security Training

Audits

-  SOC1
-  SOC2
-  HIPAA
-  Penetration Testing
-  Vulnerability Testing

Privacy: Respecting your customer or member trust and being data-driven are not in conflict.

Privacy is a customer-centric issue.

Build it in.

Embrace a clear transparency and consent framework.

Business and legal teams are working together to ensure brands leverage their data.

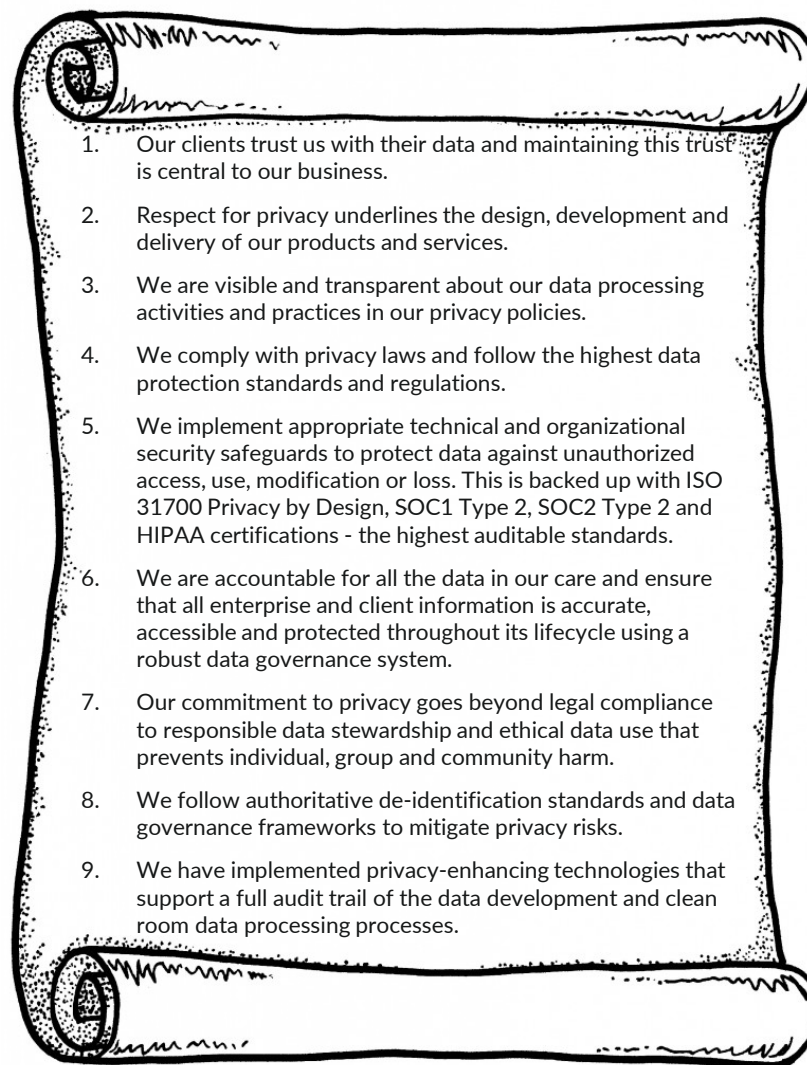

Do what a reasonable person would reasonably expect.

Big data is valuable – but requires governance.

Data are key to innovation and to harnessing the power of AI.

Data make things run better – promote data literacy.

From our Chief Privacy Officer. Our Guiding Principles.

Introducing EA Data Collaboration Services (EA DCS). Unlocking better outcomes by connecting all partners.

How we think about it.
All the pieces connected.

Driving Product Initiatives

Analytics in ENVISION

Agentic AI enablement of everything. Let's go.

Autonomous AI Agents

- Orchestrating complex workflows
- Performing data discovery & analysis
- Generating insights across industries and markets
- Personalizing reporting
- Bring-your-own-model

Unified Data & Logic Layer

- Centralized EA MCP server
- Semantic database views
 - Qualified meta data
 - Example queries
 - Logic around use cases
- Secure API access (Python/Rest)
- Governed access to all EA data assets

Strategic Business Impact

- Accelerating insights delivery
- Improving decision velocity
- Enhancing operational efficiency
- Reducing manual data effort
- Empowering end-users
- Resulting in better business outcomes
